

Here is a guide on how to use LUCKY ME the lottery game functionality of the decentralized application (dApp):

1. Firstly, you must have a Binance Smart Chain-supported wallet like Trust Wallet, TokenPocket, or Metamask. If you don't have one, you can download and install any of these wallets from their respective app stores.

2. Once you have a Binance Smart Chain-supported wallet, open it and connect it to the dApp. You can do this by clicking on the "Connect Wallet" button on the dApp's homepage and selecting your wallet from the list of available wallets.

3. After connecting your wallet, your wallet's balance will be displayed on the dApp's dashboard. To add funds to your wallet, you can follow the below steps:

a. Open your Binance Smart Chain-supported wallet.

b. Click on the "Receive" button to get the address.

c. Go to your exchange or another wallet and transfer BUSD to this address.

d. Once the BUSD is in your wallet, this amount will reflect in the Balance button on top of the dApp's home page.

4. You can now use your wallet balance to participate in Lucky Me's lottery games by selecting different pools and entering the amount of BUSD you wish to participate. Each pool has a minimum and maximum entry amount. Here's a table with the details:

S.No.	Pool	Min. Entry(BUSD)	Max. Entries(BUSD)
1	10x	1	10
2	20x	1	10
3	50x	1	10

S.No.	Pool	Min. Entry(BUSD)	Max. Entries(BUSD)
4	100x	1	20
5	250x	1	50
6	500x	1	50
7	1,000x	1	80
8	2,500x	1	100
9	5,000x	1	200
10	10,000x	1	400
11	25,000x	1	1,000

S.No.	Pool	Min. Entry(BUSD)	Max. Entries(BUSD)
12	50,000x	1	2,000
13	100,000x	1	3,000
14	250,000x	1	6,000
15	500,000x	1	11,000
16	1,000,000x	1	15,000

5. Each entry is 1 BUSD, and you can participate with multiple entries at once. Once the desired amount is chosen then **Smart Contract ask you to set a sending cap this means you have to enter how much entires you have selected and then** the amount will be deducted from your wallet balance for the purchasing entries. The lottery will end in either of the two scenarios, either when the total number of entries is filled, or when the time is over.

6. After the lottery ends, the winners will be decided randomly by the contract, and the funds will be distributed to the winners' respective wallets. You can withdraw your winnings accordingly.

7. The winners of the lottery will be determined by either the total number of entries filled or the winner's ratio method, depending on how the lottery ends. In the winner's ratio method, the number of winners is based on the ratio of received entries to the total expected entries. If the number of new winners is less than one, then the winner's ratio will be multiplied by the winning amount, and the resulting amount will be distributed among the number of winners specified in the table provided earlier in this guide.

While participating in the lottery game can be fun and exciting. Remember, responsible gambling is a key to ensuring a safe and enjoyable experience. "Wishing you the best of luck as you participate in LuckyMe's lottery game!"
